

THE CRISIS HITS HOME

Illinois' broken local pensions hurt taxpayers

GRADING THE LOCAL PENSION CRISIS

There's a crisis lurking in Illinois – a hidden force that's crippling city services and driving taxes higher every year.

That crisis is Illinois' broken municipal pension systems.

Local pension costs are overwhelming city finances. Some cities have seen a fourth of their budgets swallowed up by pensions. In others, every dollar of property tax revenue goes to pensions, leaving nothing for local services.

Illinois taxpayers pay the second-highest property taxes in the nation. Yet local pension costs keep rising. Taxpayer pension debt has doubled in half of Illinois' largest cities over the last decade.

Without real reform, property taxes will continue to go up, core services will face more budget cuts and retirees will risk having their pensions slashed.

THE IMPACT OF LOCAL PENSIONS ON CITY BUDGETS: WHAT MATTERS

LOCAL PENSIONS A DECADE OF COLLAPSE

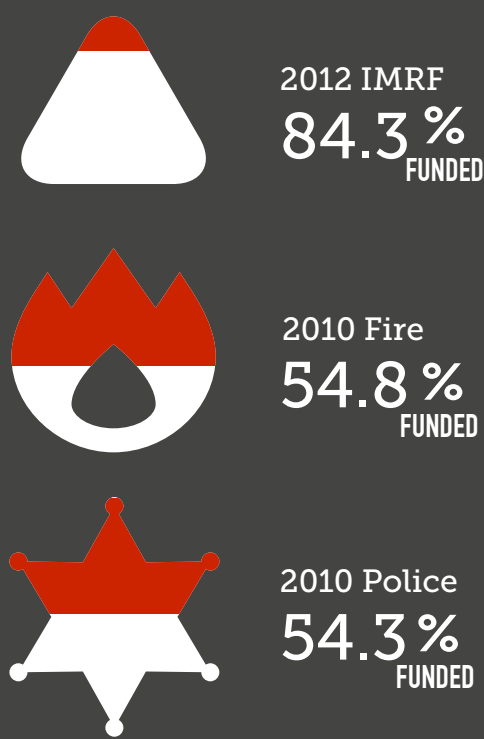

Despite massive increases in local property taxes, skyrocketing pension costs continue to wreak havoc on city budgets.

Just 10 years ago, only a quarter of Illinois' largest cities had failing pensions that put both taxpayers and government retirees at risk.

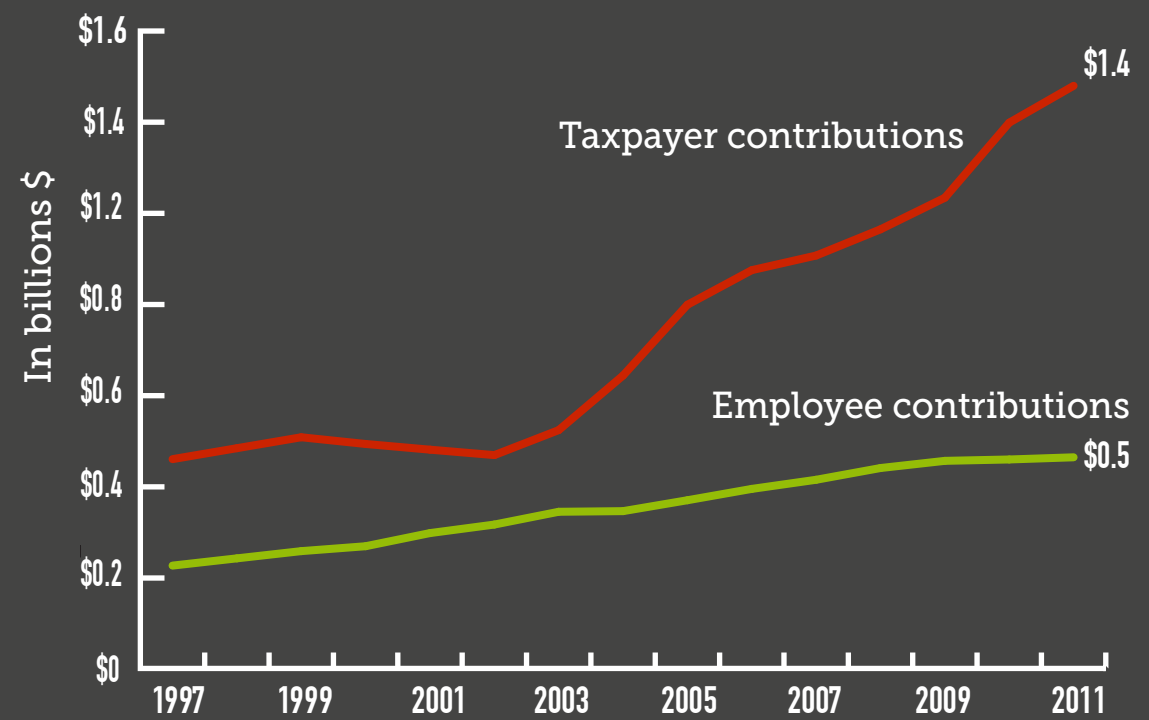

Today, 80 percent of Illinois cities are in critical condition. The reality for these cities are more tax hikes, higher user fees and cuts to funding for roads, libraries and police.

PENSION FUNDING RATIOS

TAXPAYER CONTRIBUTIONS NEARLY TRIPLE THAT OF EMPLOYEE CONTRIBUTIONS

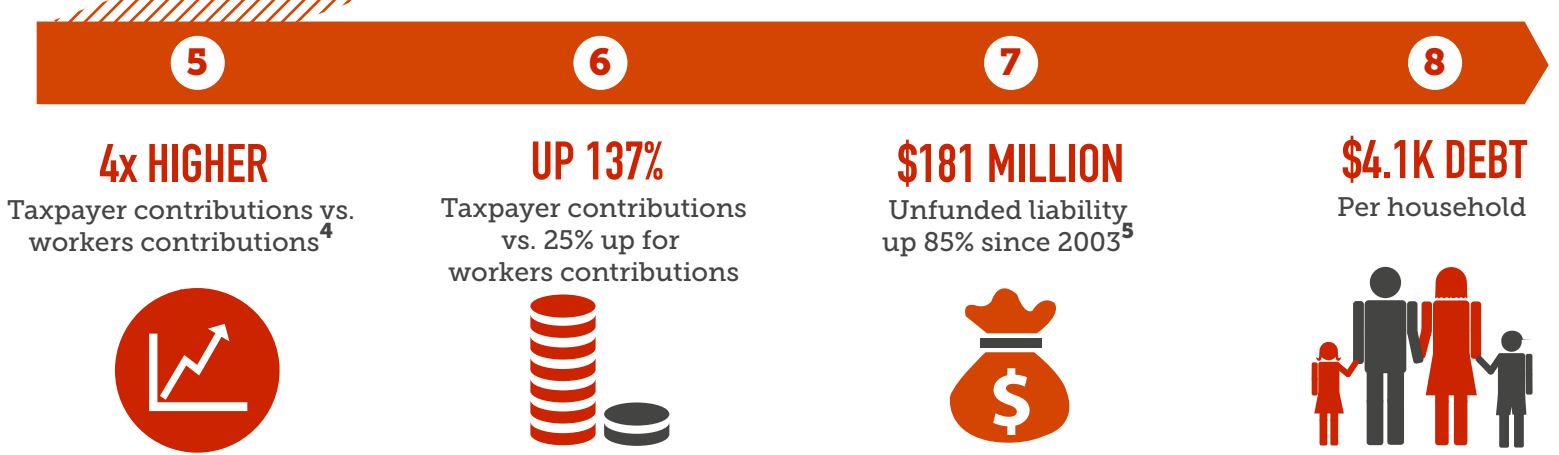

HOW WE GOT HERE PEORIA'S LOCAL PENSION CRISIS

Ever-increasing taxpayer contributions to the city's pension systems are squeezing out funding for core services.

Despite rising property taxes, households are on the hook for more and more pension debt.
